

Vision and Mission Statement

“To be the preferred supplier of process and project engineering to a select portfolio of clients.”

To gain sustainable advantage over the competition we must:

- Instill a collective commitment to the Business Plan.
- Develop competence among employees to deliver superior performance.
- Establish a culture that helps attract, keep, motivate, develop and reward leaders at all levels.

Business Plan

- Retention of existing customer base and development in blue chip chemical, pharmaceutical, energy, environmental compliance, and biotechnology sectors.
- Expansion of consultancy activities in process, safety, training services, research and development, environmental and validation.
- Expand Project Management activities and Construction Safety support by offering Clients a turnkey, comprehensive CDM capability on site.
- Develop strategic partnerships with both clients and co-suppliers.
