

Stopford Projects Ltd is a leading Engineering Design, Project Management and Consultancy Company. As a business we are committed to minimising the environmental impact of our operations, through the adoption of sustainable practices and the continuous improvement of our environmental performance.

The core principles which underpin the implementation of the company's environmental policy are that:

- We comply with the requirements of environmental legislation and approved codes of practice in the countries and regions in which we operate.
 - We assess the environmental impact of all company operations, both current and future, and seek to minimise potential adverse environmental effects associated with our activities.
 - We seek to continuously improve environmental performance of our processes, products and services through research and development of new technologies and implementation of best available practice.
 - We analyse our business activities to reduce emissions to the environment, to minimise waste and to control noise.
 - We act responsibly to conserve resource use through efficient environmental planning and maximise energy efficiency in our processes and products.
 - We ensure that all employees are aware of the potential environmental effects of their activities and provide training to improve performance.
 - We encourage our customers to consider the environmental implications of their business and advise the use of products and services in an environmentally-sensitive way.
 - We expect our suppliers and contractors to demonstrate a responsible attitude to environmental issues.
 - We liaise with local communities, key stakeholders and other interested parties with regard to general environmental issues in and around our sites.
 - We always act responsibly to safeguard the health and safety of our employees and the communities in which we operate by employing safe and understood technologies.
-
