Process Safety Consultant

Competitive Salary

Knutsford, Cheshire (hybrid working)

If you have a passion in supporting others to help their transition to net zero, then there has never been a better time to join Stopford.

Stopford have a fantastic opportunity for a Process Safety Consultant to work as part of a multidisciplinary team that works closely together with the aim of addressing our client's needs and help their transition to net zero. This is an excellent opportunity for someone in the early stages of their career who can be trained and mentored and provided opportunities in a broad range of industries.

This is a full-time, permanent position based in Knutsford with hybrid working.

The Role of Process Safety Consultant

Reporting to the Lead Process consultant you will generate proposals, deliver projects and consultancy activities working within agreed timescales and budgets so that the needs of the client are fully met, together with the business needs of the company.

The Process Safety Consultant will have responsibility for:

- Contributing to providing a high level of process safety expertise within Stopford.
- Ensuring that process safety services delivered to Stopford's clients are maintained at a high standard and comply with relevant standards.
- Supporting the Senior Process Safety Consultant to develop and communicate company process safety standards (e.g. risk assessment, LOPA, etc).
- Leading process safety risk assessments and assist in reviewing existing process safety risk assessments.
- Acting as Project Lead on smaller projects within your areas of expertise where business needs dictate.
- Providing advice on process safety issues as requested by engineering design teams on specific projects.
- Ensuring that process safety reports, calculations and other documents are fit-for-purpose and of a high quality in accordance with the Quality Management System.
- Developing and maintaining up to date knowledge and professional competence in process safety speciality to include legislative requirements and industry best practice.
- Demonstrating flexibility and customer focus and perform any other tasks within the overall scope of process safety, which may be reasonably required to ensure the efficient operation of the Company.
- Carrying out all job duties in accordance with the company's Quality System and the Health and Safety policy.

About you

- Degree in Chemical Engineering and working towards chartered status.
- Ideally a minimum of 4 years post-graduate relevant experience.
- Preferably experienced in Process Safety risk assessment methodologies, such as DSEAR, Hazard Studies, QRA, Human Factors.
- Ability to apply skills into different sectors.
- Experience in working in multi-discipline engineering teams.
- Experience in managing client relationships in a technical role.
- Organisational and administrative skills.
- Clear and concise communication in both written and verbal form with excellent people management and interpersonal skills.
- Working knowledge of Office 365 including One Drive and Sharepoint with proficient use of Word and Excel.
- Eligible to live and work in the UK.
- Full UK/EEC driving licence.

The Company

Stopford is an international energy and environmental engineering company, our professional services span Consultancy, Technology and Innovation and Project Delivery. We are an industry leader with a portfolio spanning research and development through to design and commissioning of process, power, and renewables technology. With a worldwide clientele in emerging and existing industries, we provide a full range of project management and engineering services.

Stopford is committed to environmental improvement and is proactively working to minimise its impact on the environment, demonstrated by the achievement of ISO 14001.

Employment at Stopford brings many benefits including:

- Competitive salary
- Profit related bonus payment (10%)
- Pension (5% employer and 5% employee)
- 25 days holiday plus bank holidays
- Additional day off to celebrate your Birthday
- Private medical insurance
- Employee assistance programme
- Free on-site parking
- Reimbursement of professional membership fees
- Long service awards

Please go to our website for a full job description to familiarise yourself with all of the responsibilities, skills and experience required before you apply.

Please note that we do not accept applications from agencies, and you must be eligible to live and work in the UK.

We look forward to receiving your CV for the post of Process Safety Consultant.

Closing date: 21 July 2024

Stopford reserves the right to bring forward the closing date if we receive a suitable number of quality applications from which to make a shortlist. Therefore, we would recommend that you apply as soon as possible.

Please note that due to the volume of applications we receive we are unfortunately not able to respond to each applicant. If you have not been called for interview within 3 weeks of the closing date, you should assume that on this occasion your application has not been successful.

Description

Reporting to the Lead Process Consultant, Stopford Ltd is looking to recruit a Process Safety Consultant to carry out process safety consultancy duties. These include generation of proposals, delivery of projects and consultancy activities, working within agreed time scales and budgets so that the needs of the client are fully met, together with the business needs of the company.

As a Process Safety Consultant, you will be part of a multidisciplinary team that works closely together with the aim of addressing our client's needs and help their transition to net zero.

Key Accountabilities/Responsibilities

As a Process Safety Consultant, you shall:

- Contribute to providing a high level of Process Safety expertise within Stopford.
- Ensure that Process Safety services delivered to Stopford's clients are maintained at a high standard and comply with relevant standards.
- Support the Senior Process Safety Consultant to develop and communicate company process safety standards (e.g. risk assessment, LOPA, etc).
- Lead process safety risk assessments and assist in reviewing existing process safety risk assessments.
- Act as Project Lead on smaller projects within your areas of expertise where business needs dictate.
- Provide advice on Process Safety issues as requested by engineering design teams on specific projects.
- Ensure that Process Safety reports, calculations and other documents are fit-for-purpose and of a high quality in accordance with the Quality Management System.
- Develop and maintain up to date knowledge and professional competence in process safety speciality to include legislative requirements and industry best practice.

- Demonstrate flexibility and customer focus and perform any other tasks within the overall scope of Process Safety, which may be reasonably required to ensure the efficient operation of the Company.
- To carry out all job duties in accordance with the company's Quality System and the Health and Safety policy.

Minimum Requirements – Education and Experience

- Degree in Chemical Engineering and working towards chartered status
- Ideally a minimum of 4 years post-graduate relevant experience
- Preferably experienced in Process Safety risk assessment methodologies, such as DSEAR, Hazard Studies, QRA, Human Factors
- Ability to apply skills into different sectors
- Experience in working in multi-discipline engineering teams
- Experience in managing client relationships in a technical role
- Organisational and administrative skills
- Clear and concise communication in both written and verbal form with excellent people management and interpersonal skills
- Working knowledge of Office 365 including One Drive and Sharepoint with proficient use of Word and Excel.
- Eligible to live and work in the UK
- Full UK/EEC driving licence

Company Wide Aspects

- Adhere to Stopford's Business Management System.
- Align with and promote Company Values and Vision.

Review

The above is not an exhaustive list of duties and you will be expected to perform different tasks as necessitated by your role within the organisation and the overall business objectives of the organisation.
