

Senior Process Engineering Consultant

Competitive Salary

Knutsford, Cheshire

If you have a passion in supporting others to help their transition to net zero, then there has never been a better time to join Stopford.

Stopford has a truly exciting opportunity for a Senior Process Engineering Consultant to join the team on a full time permanent basis to help our clients to transition to net zero as we expand our operations in the UK and internationally.

The Position

As a Senior Process Engineering Consultant, you will be part of a multidisciplinary team that works closely together with the aim of addressing our client's needs and helping their transition to net zero.

You will help us safely reduce the environmental impact of complex industrial processes focusing on a safe transition to low carbon economy.

The Senior Process Engineering Consultant will have responsibilities for line management of junior members of the team, proposals, and projects activities, working within agreed time scales and budgets so that the needs of the client are fully met, together with the business needs of the company.

The Company

Stopford is an international multi-disciplinary consultancy, engineering design and project management services company founded in the UK in 1982. We work with companies around the world in emerging and existing industries, *our ambition is to lead the way in engineering a sustainable world towards a low carbon economy.*

We have ambitious plans for future growth over the next three to five years supporting our key clients in the renewables and green energies sector and commercialising Stopford's green technology portfolio. We have a significant opportunity to expand our operations in the UK and internationally and the role of Senior Process Engineering Consultant will support this growth.

Your time will primarily be based at our office in Knutsford occasional visits to Client sites.

Employment at Stopford brings many benefits including:

- Competitive salary
- Profit related bonus payment
- Pension
- 25 days holiday plus bank holidays
- Private medical insurance
- Employee assistance programme
- Free on-site parking
- Reimbursement of professional membership fees

In order to be successful in the position of Senior Process Engineering Consultant you will:

- Degree in Chemical Engineering and preferably chartered status.
- Able to demonstrate process engineering design skills

- Experienced in designing and specifying main engineering Process Safety equipment
- Experienced in DSEAR assessment
- Experienced in facilitating/chairing hazard studies
- Preferably experience in consequence modelling
- Experience in working in multi-discipline engineering teams
- Experience in managing client relationships in a technical role.
- Organisational and administrative skills
- Clear and concise communication in both written and verbal form with excellent people management and interpersonal skills
- Working knowledge of Office 365 including One Drive and Sharepoint with proficient use of Word and Excel.

A full UK driving licence is essential for this position.

Please go to our website for a full job description to familiarise yourself with all of the responsibilities, skills and experience required before you apply for the position.

We look forward to receiving your CV for the role of Senior Process Engineering Consultant.

Please note that we do not accept applications from agencies, and you must be eligible to live and work in the UK.

Closing date: 28 June 2022

Stopford reserves the right to bring forward the closing date if we receive a suitable number of quality applications from which to make a shortlist. Therefore, we would recommend that you apply as soon as possible.

Please note that due to the volume of applications we receive we are unfortunately not able to respond to each applicant. If you have not been called for interview within 3 weeks of the closing date, you should assume that on this occasion your application has been unsuccessful.
