

Quality Policy Statement

Stopford Energy and Environment is an innovative engineering design and project management consultancy providing engineering solutions to a broad range of Clients. Our mission is to be the partner of choice for our Clients.

The Directors will have the primary responsibility for implementing the Quality Policy, allocating resources and establishing and supporting Quality standards and systems.

Management at all levels will take actions to ensure that all employees understand the meaning and importance of this policy. Our employees are responsible for integrating Quality considerations into their daily work activities.

The Quality Policy is reviewed to establish its' continuing suitability during the Management Review process. The Managing Director is responsible for communicating the Quality Policy within all levels of the organisation.

All employees are responsible for maintaining and continuously improving our Quality Management System (QMS) and achieving our Quality Objectives through daily actions and activities.

Appropriate financial and physical resources are committed by the Company for the necessary information, instruction, supervision, protection and / or training to be provided to staff to enable them to discharge their duties within the QMS.

This policy is communicated to all individuals, reinforced on a routine basis and posted throughout our facilities.
